WHAT'S NEWEST AND BEST

HDI strives to build state-of-the-art road machinery that meets various preferences and ensures maximum performance, higher precision and superior quality.

THE BEST PRODUCTIVITY AND FUEL EFFICIENCY

- High performance and fuel-efficient engine
- Reliable and proven transmission
- Strong A&U-shaped drawbar and optimal curvature moldboard
- Wide tires (17.5-25 12PR L3)
- Bright and long-lasting LED lights

EASY MAINTENANCE

- Easy access to service areas
- Disconnect switch
- Replaceable wear inserts

EASY CONTROL AND OPERATOR'S SAFETY

- Spacious cabin with excellent visibility
- Dual (Lever & Pedal) throttle control
- ROPS Frame (Optional)
- Air-conditioner
- Adjustable Control Console
- Suspension Seat
- Beacon Lamp (Amber) (Optional)

WORK TOOLS AND ATTACHMENTS

- Durable frame and attachments
- Automatic leveling device (Optional)
- Tire 13.00-24-12PR G-2 (for agriculture) (Optional)
- Scarifier (Mid, V-type, 11 shanks) (Optional)
- Ripper (3 or 5 shanks) (Optional)
- Front Dozer (Optional)

High Efficiency

High Stability

Low Fuel Consumption

THE BEST PRODUCTIVITY AND FUEL EFFICIENCY

DRAWBAR, CIRCLE AND MOLDBOARD

The drawbar is composed of strong A & U-shaped frame for strength durability, and precise blading control. The heat-treated rotating ring structure is equipped with four turntable of inner gear guide type, can obtain 360° smooth rotation. The moldboard provides optimal curvature that helps move all soil types quickly and efficiently.

HIGH PERFORMANCE AND LOW EMISSION ENGINE

HDI MOTOR GRADERS, Cummins turbocharged engine, realizes high productivity and low fuel consumption.

Durable mechanical inline fuel injection system provides precise throttle control and thus it delivers higher work speeds with high horsepower.

RELIABLE AND PROVEN TRANSMISSION

ZF-technology powershift transmission is best matched with Cummins engine and is reliable and easy to operate, suited for all types of working conditions.

MAINTENANCE

EASY ACCESS TO SERVICE AREAS

Side-open engine hood doors improve accessibility to service points for daily check and replacing filters.

DISCONNECT SWITCH

For maintenance, the batteries can be disconnected with this switch when repairing the machine or checking batteries.

REPLACEABLE WEAR INSERTS

High load-resistant wear inserts are installed between the blade mounting group and moldboard. It can be replaced easily and helps keep components tight for fine grading.

EASY CONTROL AND OPERATOR'S SAFETY

EXCELLENT VISIBILITY

Excellent visibility and layout side pillar boosts operator's confidence and productivity in all grader applications. Well-positioned blade linkage provides an unobstructed view of the moldboard and front tires.

REAR VIEW

ADJUSTABLE CONTROL CONSOLE

The control console moves back and forth and the operator easily gets in and out of the operator compartment. The steering wheel also tilts to suit the operator's preference.

LED LIGHTS

Bright and long-lasting LED lights are applied to cabin (Front/Rear) and attachment.

AIR CONDITIONER

Increase air flow rate by refurbishing the shape of air outlets.

SUSPENSION SEAT

Adopt high-rigidity suspension seat to enhance vibration absorption.

Durable frame and attachments Box-type frame and advanced transmission enable heavy-duty work, while the flexible blade suspension system and articulated frame allow for wide working ranges.

FRONT DOZER (OPTIONAL)

The front dozer is a front mounted equipment used for spreading materials such as gravel piles or blading at the front of the machine where is difficult to access with the moldboard.

RIPPER(REAR) AND SCARIFIER(MID-MOUNT) (OPTIONAL)

Digs up hard material cannot be removed by the moldboard. The V-type scarifier can accommodate up to 11 teeth, the ripper also accommodate 3 or 5 shanks.

AUTOMATIC LEVELING DEVICE (OPTIONAL)

As a 2D control system, Automatic Leveling Device offers precise and reliable height and slope control and a high level of flexibility in the choice of sensors and fields of application.
